Dawid Mszanowski
Backend Engineer

A 24 years old tech enthusiast with almost 3 years of commercial experience as a Backend Developer. Formerly served as an IT Administrator. On weekends I study CS at master's level.

Most of my coding experience revolves around TypeScript and NestJS, but given my proven track record as a swift learner, there is no stack or tool that daunts me. There are many technologies I am already familiar with with and you can easily find them listed on the right.
